

The mission of Operation Healing Forces (OHF) is to serve the needs of our active-duty and recent-veteran wounded, ill, and injured Special Operations Forces (SOF) and their families by starting or continuing the process of mentally, physically and emotionally healing in preparation to return to the fight or transition successfully into civilian life. KAATSU has partnered with OHF to aid SOF and their families by donating a portion of their proceeds and supplying KAATSU devices fostering rehabilitation, reintegration, and resiliency in the Special Operations Community.

KAATSU®

Helping our elite recover and perform at their best.

Accelerate Rehabilitation

Recover Quicker From Injury and Training

Improve Human Performance

The *only* intelligent, automated pressure system for training, rehabilitation, and recovery.

KAATSU is the pioneer in the BFR (Blood Flow Restriction) market and the only system with applications for training, rehabilitation, and recovery.

Easy to use at home and during travel, rehabilitation, and training, the KAATSU C3 is a ruggedized, compact, handheld device that improves blood circulation and produces significant hormonal responses to help the body heal and become more resilient.

Used by Olympic athletes, pro sports teams, and disabled individuals, KAATSU is convenient, effective, and efficient and can be used anywhere, anytime, by anyone.

KAATSU is used by:

KAATSU C3

FEATURES

3rd generation product

Simple to use

Works anywhere (air/land/water)

Use with rehabilitation

Use for recovery

Use for athletic performance

Consecutive KAATSU Cycle mode

Consecutive KAATSU Constant mode

6 pressure level presets

Customizable pressures (0-400 SKU)

Compact, lightweight, fits in pocket

Fully ruggedized

PACKAGE (MSRP \$999)

4 patented pneumatic bands

2 arms + 2 legs in S, M, L, or XL

USB charger

Online education program

Optional smartphone app

Optional finger pulse oximeter

Access to performance database

One-year warranty

US patent #9,775,619

John Doolittle

*Chief Revenue Officer
of KAATSU Global*

“No other device can do what KAATSU does. It’s unique automated pressure system transformed my rehabilitation, cutting my recovery time by over 50%.”

JD@KAATSU.com
+1-727-247-9173

John Doolittle served our country in US Special Operations for 25 years. During his time with Naval Special Warfare (NSW) he needed many orthopedic interventions requiring 12 surgeries. Towards the end of his service, embedded physical therapists used the KAATSU intelligent pressure system on John after shoulder surgery, resulting in a 50% reduction in rehab time from the same injury 6 years earlier; an unprecedented result.

John appreciated the benefits of KAATSU for rapid rehabilitation, and later used KAATSU to rehab from bicep tendon surgery, as well as a total knee replacement. After seeing impressive performance and recovery results for himself and other tactical athletes, he decided to join the KAATSU Team and bring this industry leading technology to all federal and government entities.

When he retired from NSW, John took up a senior role with KAATSU Global, the company that changed his life.

His mission—to deploy KAATSU where it can have the most impact and benefit for those who serve our country.

Joseph Lowrey

*Cofounder of United Wings
of Liberty Foundation*

“I am greatly indebted for this huge blessing that has helped me regain some independence back into my highly affected life due to my combat injury.”

JLOWREY@UWOL.ORG

Joseph Lowrey retired as a U.S. Army Green Beret Sergeant 1st Class. The Long Beach, California native is a twice-daily KAATSU user after improbably surviving a horrific gunshot wound to his head during a combat tour in Afghanistan. While serving with the 7th Special Forces Group in July 2014 in Afghanistan, Lowrey led his fellow soldiers to enter an area known to be a Taliban stronghold. His injury occurred during Lowrey’s third overseas deployment while manning the gun turret on top of a truck during an intense firefight against Taliban insurgents. When a PKM machine gun bullet pierced his Kevlar helmet and he was hit, the medic gave him an emergency tracheotomy on the battlefield. After surgery, his colleagues were told that Lowrey would not survive the night. He ultimately emerged from a coma after a month.

The Purple Heart recipient endured years of excruciatingly painful rehabilitation. Lowrey incorporates KAATSU as part of his unlikely and unexpected recovery. Doing KAATSU twice daily, he has made strides to where he is able to walk with a cane and significant decreases in spasticity and increases in strength.
